CS 4300/5300 Software Engineering

Sprint 0-1: Project Pitches and Preference Selection

Pitches are delivered in class. Preferences are submitted after all pitches have been heard.

1 Purpose

Every team pitches the idea they submitted in Sprint 0-0. After all pitches have been heard, each team submits its ranked preferences for which project it wants to build. You will not be building the project you pitched. Ranking happens across the whole class, and assignments are made by the professor.

2 Sprint 0-1 Objectives

Requirement	**Points**
In-class project pitch	60 pts
Preference form submitted	40 pts
Total	**100 pts**

3 Detailed Requirements

3.1 In-Class Project Pitch (60 pts)

Present the project your team proposed in Sprint 0-0. Keep it short—you are selling an idea, not defending a thesis. Cover:

- the problem;
- what you intend for the development team to build, in concrete terms;
- the key features that make it worth a semester of work;
- where the database, the third-party API, and the AI API fit; and
- the single thing you are least sure about.

Every team member should speak and remember that your audience is the rest of the class, and they are about to rank these projects. A pitch that nobody understands will not be chosen by anybody and your project will lose points.

3.2 Preference Form Submitted (40 pts)

Listen to every pitch. Then, as a team, submit your ranked preferences using the course preference form in Canvas.

The form asks for:

- your team number;

- your 1st choice project;
- your 2nd choice project; and
- your 3rd choice project.

Submit **one response per team**, not one per student. Decide on your ranking together before anyone opens the form. Rank three **distinct** projects. Submitting fewer than three choices, or ranking the same project more than once, reduces the instructor's ability to honor your preferences.

4 Submission Requirements

- Deliver your pitch in class.
- Submit the preference form once, on behalf of your team, after all pitches have been heard.

There is no document to write for this sprint. The pitch and the preference form submission are the deliverables.
